

CONNECTING THE HARVEST TO THE HOME

IT BEGINS WITH A KERNEL OF CORN

ADM TRANSFORMS CORN into 24 different products that serve vital needs for food and energy. From food ingredients and animal feed to industrial chemicals and biofuel, corn becomes a host of products that are used by consumers and businesses around the world every day.

IT BEGINS WITH DEDICATION

SOURCING

From the most fertile regions of the world, we source corn, oilseeds, wheat, cocoa and palm to meet the needs of a growing world.

TRANSPORTING

Our expansive global transportation network includes 600 trucks, 1,300 trailers, 26,700 railcars, 2,300 barges and 39 oceangoing vessels that move crops from local elevators to processing plants and customers around the world.

PROCESSING

We efficiently process every seed, grain and kernel that reaches our more than 270 processing facilities to help ensure no part of the harvest goes to waste.

AND BECOMES PART OF YOUR EV

Sorbitol

Dietary Fiber

Industrial Chemicals

Sweeteners

Ethanol

EVERYDAY LIFE

Starch

Corn Oil

Lysine for Feed

Thickeners

IT BEGINS WITH AN OILSEED

IN 1902, ADM MARKED THE BEGINNING of a future full of innovation with the production of linseed oil. Today, oilseeds including soybeans, canola, flax, sunflower seeds and cottonseeds are processed at ADM facilities worldwide at a rate of 150,000 metric tons per day to make an array of high-quality ingredients and products.

IT BEGINS WITH DETERMINATION

TRANSFORMING

We evaluate every seed, every grain and every kernel. What part can we use more efficiently? What innovation can we apply to meet customers' changing requirements? At ADM, we continue to identify opportunities to transform crops into products that serve vital needs.

DISTRIBUTING

Our unparalleled transportation and logistics network allows us to efficiently and cost-effectively deliver finished products to customers on time, even under challenging conditions.

MARKETING AND SELLING

By providing quality products, building valued customer relationships and identifying new markets and uses for agricultural products, ADM connects the harvest to the home.

AND BECOMES A VAST RANGE OF

Soy Flour

Industrial Oils

Vegetable Oils

Lecithin

Soy Protein

F VITAL PRODUCTS

Biodiesel

Oilseed Meal

Texturized Vegetable Protein (TVP)

Vitamin E

Plant Sterols

IT BEGINS WITH A GRAIN OF WHEAT

ADM PROCESSES 36,000 metric tons of wheat each day at locations throughout the United States, Canada, the Caribbean, Central America and the United Kingdom. We process spring-wheat, soft-wheat and hard-wheat flours for breads and baked goods, pasta, cereals, snacks and other products.

IT BEGINS WITH COMMITMENT

SAFETY

Safety is a passion and a priority for us. We strive for zero incidents, zero injuries—working to ensure that every colleague goes home safe every day. We provide safety training for all employees and support farm safety programs in our communities.

SUSTAINABILITY

Our focus on sustainability helps ensure the longevity of our business — and our planet. By identifying risks all along our value chain, we can help address issues related to safety, human rights, product quality and the environment.

AND BECOMES A WELL-NOURISH

Pizza and Tortilla Flour

Pastry and Cake Flour

Wheat Starch

Wheat Midds for Feed

ED LIFE

Bread Flour

White Whole Wheat Flour

Wheat Proteins

High Gluten Flour

Wheat Gluten

IT BEGINS WITH A COCOA BEAN

ADM IS A PREMIER SUPPLIER of cocoa and chocolate ingredients. Most of the world's cocoa is grown on small family farms in places like Ghana, the Ivory Coast, Indonesia and Brazil. We select only the finest cocoa beans for our cocoa brands. The result is a wide range of products and ingredients that make life a little sweeter.

IT BEGINS WITH THE FARMER

Our work would not be possible without the dedication of farming families around the world. That's why ADM works both independently and cooperatively with other industry participants and NGOs to help growers worldwide—including cocoa farmers in west Africa and Indonesia and soy growers in Brazil—improve crop quality and yields. And, it's why the ADM Institute for the Prevention of Postharvest Loss at the University of Illinois focuses on ways to help farmers in the developing world preserve more of what they grow.

Creating a brighter future for the world's farmers can help ensure that global agriculture, and ADM, are able to serve the world's vital needs for many, many years to come.

AND BECOMES A SWEETER LIFE

Unsweetened Baking Chocolate

Fountain Chocolate

Cocoa Powder

Rainbow™ Coatings

Private Label

Chocolate Chunks

Chocolate Chips

Chocolate Coatings

Ice Cream Coatings

Specialty Cocoas

CONNECTING THE HARVEST TO THE HOME

What begins with a farmer's crop becomes a part of your everyday life—a brighter, well-nourished, sweeter life. At ADM, we serve vital needs for food and energy, connecting the harvest to the home.
